

SplatCat Open Source Attributions & Compliance Report

Generated: 2026-08-03 | License Standard: Apache-2.0, MIT, BSD-3-Clause

EXECUTIVE SUMMARY:

SplatCat is a commercial-grade 3D Gaussian Splatting application ecosystem for macOS and iOS. To guarantee full commercial distribution and resale compliance, all third-party repositories used operate exclusively under permissive open-source licenses (Apache-2.0, MIT, BSD-3-Clause).

SUMMARY OF PERMISSIVE OPEN-SOURCE DEPENDENCIES:

1. GLOMAP (BSD-3-Clause) - github.com/colmap/glomap
Global Structure-from-Motion (SfM) camera pose solver ([crates/engine/src/sfm_glomap.rs](https://crates.io/crates/engine/src/sfm_glomap.rs)).
 2. COLMAP (BSD-3-Clause) - github.com/colmap/colmap
Sparse feature extraction, camera calibration, and point cloud data model reference.
 3. Brush (Apache-2.0) - github.com/ArthurBrussee/brush
Differentiable 3DGS rasterization engine running on Apple Silicon Metal via Rust ([wgpu](https://wgpu.rs)).
 4. gsplat (Apache-2.0) - github.com/nerfstudio-project/gsplat
Mathematical reference for 3D Gaussian rasterization & spherical harmonics.
 5. Nerfstudio (Apache-2.0) - github.com/nerfstudio-project/nerfstudio
Pipeline architecture reference for splat pruning and density optimization.
 6. SuperSplat (MIT) - github.com/playcanvas/supersplat
PlayCanvas WebGL2/WebGPU browser viewport engine in [packages/web-viewer/](https://packages.playcanvas.com/web-viewer/).
 7. GaussianSplats3D (MIT) - github.com/mkkellogg/GaussianSplats3D
Three.js WebGL fallback renderer for single-file standalone web exports.
 8. antimatter15/splat (MIT) - github.com/antimatter15/splat
High-speed WebGL sorted point buffer rendering reference implementation.
 9. Niantic SPZ (MIT) - github.com/nianticlabs/spz
Binary compression specification for 3D Gaussians (up to 85% file size reduction).
 10. MonoGS (BSD-3-Clause) - github.com/gaussian-splatting-slam/MonoGS
Monocular SLAM architectural reference for real-time camera tracking.
 11. MVSplat (MIT) - github.com/zhengfei-kuang/mvsplat
Feed-forward multi-view sparse 3D reconstruction model reference.
 12. Three.js (MIT) - github.com/mrdoob/three.js
3D Web scene graph and WebGL rendering engine used in browser viewports.
-

COMMERCIAL RESALE EXCLUSION GUARANTEE:

The following repositories were explicitly audited and EXCLUDED from SplatCat due to

restrictive licensing terms:

1. Original Inria 3DGS ([graphdeco-inria/gaussian-splatting](https://github.com/graphdeco-inria/gaussian-splatting)) - Non-Commercial License.
2. DUST3R / MAST3R - CC-BY-NC-SA 4.0 Non-Commercial License.
3. Photo-SLAM - GPL-3.0 copyleft terms.
4. OpenSplat - AGPLv3 network copyleft terms.

CONCLUSION: SplatCat is 100% compliant with commercial resale requirements.
